Pyrenean Mastiff Association of America Reproduction Bank Application for Semen Collection

The following application is for the purpose of gathering information about a specific dog with the sole intention of submitting a collection of frozen semen to the Pyrenean Mastiff Association of America's Reproductive Bank. The information provided on this application will be utilized to promote this dog for stud publicly on the PMAA website and pedigree database. PMAA will not advertise the semen as available until stud owners are no longer offering semen for sale privately unless otherwise noted on this application.

Submitting this application does not guarantee that PMAA Reproduction Bank Committee will approve the application and pay/reimburse collection and storage costs of the semen. Please wait before scheduling any appointments for application approval.

PMAA's Reproduction Bank Committee Reserves the right to move semen from public access to conservatory at any time. Conservatory status is when frozen semen is no longer available for public access and will be stored for any number of specified years for future use and benefit to the breed.

PMAA's Reproduction Bank Committee must approve the release of the semen as well as stud owners pending status of semen.

- If semen is donated to PMAA then the PMAA Reproduction Bank Committee is solely responsible for approving release of semen.
- If PMAA is managing the semen then PMAA Reproduction Bank Committee must approve the release of the semen as well as the Stud Owner approving use of the semen by a specific bitch.
- Semen is not permitted to be used on an bitch who has not been approved.
